

Standard Operating Procedure (SOP)

Milk Pasteurization Procedure

Document Information

Document Number: SOP-PROD-001

Version: 1.0

Status: Draft

Department: Production

Process Owner: Production Manager

Prepared By: Sarah Wanjiku (QA Manager)

Effective Date: 01 Aug 2026

Review Date: 01 Aug 2027

1. Purpose

To ensure raw milk is pasteurized safely and consistently to eliminate harmful microorganisms while preserving product quality.

2. Scope

Applies to all production staff operating the HTST pasteurization line at Green Valley Dairy Ltd.

3. Responsibilities

QA Manager verifies compliance. Production Supervisor oversees execution. Operators perform and record the process.

4. Procedure

1. Verify equipment cleanliness.
2. Inspect raw milk batch and record batch number.
3. Start pasteurizer and confirm 72°C for at least 15 seconds.
4. Record temperature every 30 minutes.
5. Segregate any non-conforming batch and notify QA immediately.
6. Transfer approved batch to cooling and packaging.

5. Required Records

Pasteurization Log, Equipment Calibration Record, CCP Monitoring Sheet, Cleaning Checklist.

6. References
